

GÖTEBORG, SWEDEN

2025 more housing

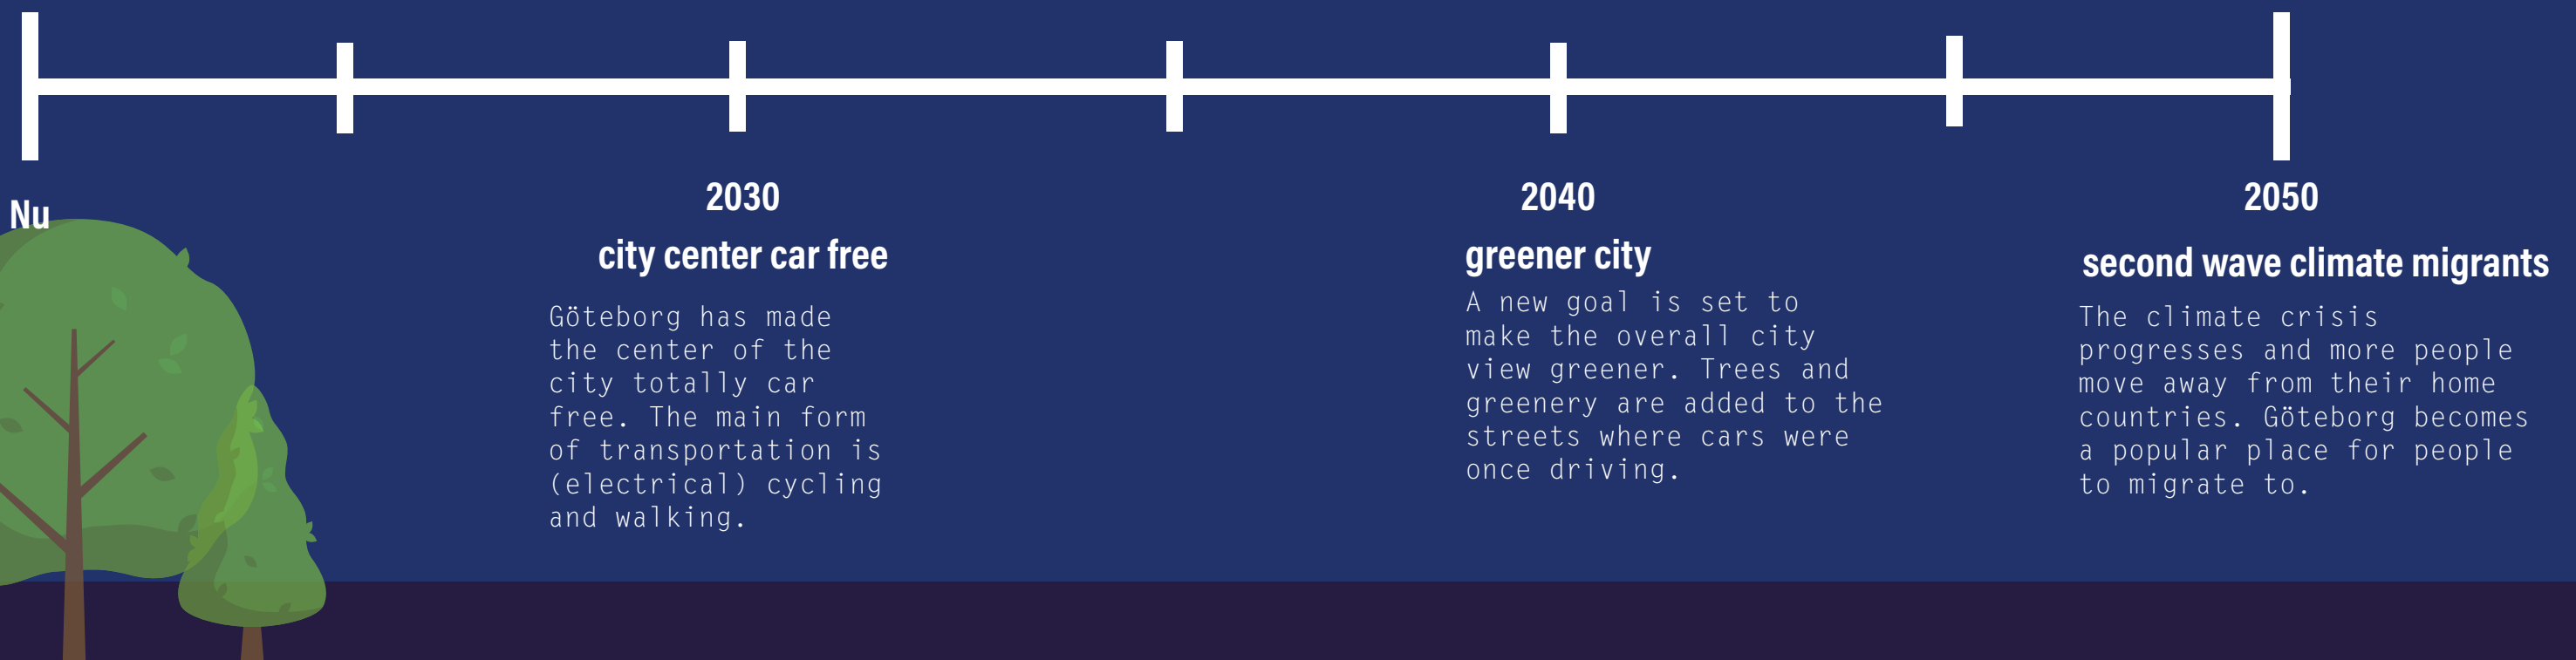

The city creates new building opportunities by adding new levels on top of older residences. This creates more housing for new inhabitants and the city doesn't need to destroy the older residences.

2035 first wave climate migrants

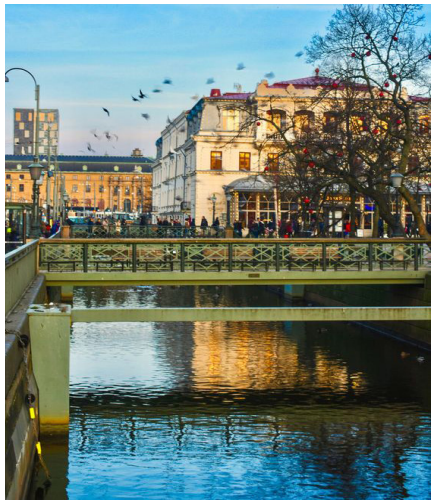

More places in the world become harder to live in because of the climate crisis. New citizens in Göteborg increase by 5%. The new housing is used in full capacity.

2045 sustainability

Once again Göteborg is voted to be the most sustainable city in the world. The city keeps making plans for the future to grow for the better.

BREAKING NEWS

Breaking News' main goal is to educate its player about a new wave of people called climate migrants. This is the result of the escalation of the climate crisis in the world. Because of the climate migrants the player will encounter the mix of different cultures. Adjusting becomes harder for new citizens.

Our main character Billy is a journalist for the local news in Göteborg. She has a great passion for reporting the latest news of Göteborg and the world. She sees the world changing around her and feels the need to let the voice of the citizens of Göteborg be heard. During her travels around the world she has witnessed the climate changing drastically in many places. Since then she has taken interest in the world's climate.

Göteborg is the most sustainable city in the world voted by the Sustainable Development Goals and has great potential to keep growing in that sense. But because of the climate crisis people move to Göteborg from worse places to experience better living conditions. The people living in Göteborg currently wish that their exceptional living situation was possible for everyone in the world and that people shouldn't have to move to Göteborg to experience this.

Billy gets the task to write her first article to capture the situation in the city. She interviews people in the city, takes photos, and writes her article in her apartment.
